

## Our Vision

We believe that our shared vision of a futuristic organization that can provide and deliver high-quality continuing education opportunities for business and industry is in great demand.

We believe the future will require a high performing organization that specializes in a number of methodologies for advanced learning and that people are seeking continuing education opportunities that provide added value to their individual professional growth and to the "bottom line" of their company.

Therefore, we will interface our customers with a cafeteria of learning products, including webinars, face-to-face seminars/workshops, laboratory projects, on-line coursework, individual learning kits, and other types of technology based learning systems.

## Our Mission

The provision of high quality management advisory and training services for technical professionals seeking training and technical assistance services and continuing education opportunities.

## Our Accreditation

We are accredited by the Commission on Accreditation for Pedorthic Education (CAPE) and recognized by the American Board for Certification in Orthotic, Prosthetic and Pedorthic Education (ABC) and by the Board for Certification / Accreditation International (BOC) as a course provider.

# Pro-Learn Pedorthic Pre-certification Program Options ( Yes... Options! )

## Why our program is different

The Pro-Learn Pedorthic Pre-certification Distance Learning Program utilizes an e-learning delivery system comprised of two-way, web-based, virtual classrooms, with VIOP conference calls, interactive multimedia presentations, streaming videos, interactive self-assessment tools, access to our extensive Webcast library, and one-on-one interaction with well qualified instructors via phone, e-mail, and video communication. All live and distance sessions are facilitated by credentialed Pedorthists with years of teaching experience. Our curriculum development team is comprised of degreed professional educators, nurses and physicians, many of which assisted in the development of the Standards use adopted by the pedorthic educators today. Programs vary from three week, live classes to completing the coursework completely online. Choose the Program Option to fit your individual needs.

## Our Approach

The goal of Pro-learn, L.L.C. is to provide services for business, industry and allied health professionals of such high caliber that the services provided are considered the "best" in the market area. We will set the standard of excellence in an atmosphere that is conducive to learning and productivity.

Three Weeks, One Week, Three Days, or Online. It's all about Options!

## Traditional Program

This live program includes lots of instructor attention in our small classes. It is designed for the individual looking for a traditional classroom learning experience who has little to no experience and needs to develop hands-on evaluation and fabrication skills in a slow paced environment.

**Program length is 3 weeks live.**

## Online Plus Program

This mixed online / live program includes lots of instructor attention in our small classes. It is designed for the busy individual looking for the convenience of an online class for lectures but still needs to develop hands-on evaluation and fabrication skills in a slow paced environment.

**Program length is approximately 3 weeks: 1 week self-paced online + 1 week live + 1 week self-paced online**

## Online Plus Fast Track Program

This mixed online / live program is a highly condensed version of our Online Plus Program. It is designed for the busy individual looking for the convenience of an online class for lectures that is familiar with hands-on evaluation and has fabrication skills.

**Program length is approximately 13 days: 1 week self-paced online + 3 days live review + 1 week self-paced online**

Easy as

The right Option for you, your business, your family, your lifestyle!

## Online Plus Fast Track Advanced Program

This online program is a highly condensed version of our Online Plus Program. It is designed for the busy individual looking for the convenience of an online class for lectures that has proven hands-on evaluation and fabrication skills. It does require the student to travel to our location for a 2 day Skills Assessment Test.

**Program length is approximately 3 weeks: 1 week self-paced online + 3 day self-paced review + 2 day live Skills Test + 1 week self-paced online**
